

SeaBlend® AS

GRANULAR FERTILIZER

SeaBlend® AS is a nutrient-rich granular fertilizer formulated to promote quick green up and growth on established turf.

SeaBlend AS nutrients are derived from a blend of natural meals and high quality traditional fertilizers. The unique marine protein meals (fish, shrimp, lobster, crab, kelp) are the rich base of SeaBlend. They provide highly diversified forms of nitrogen as amino acids along with other major and minor nutrients which become plant available over an extended time period.

Instructions for Use

Established Turfgrass and Landscape:

Use as a fertilizer for greens, tees, roughs, fairways and ornamentals. Ideal for application in Spring and/or Fall. To apply 1/2 pound of nitrogen, broadcast at a rate of 1.8 kg per 93 m² (4.16 lbs per 1,000 ft²).

Application Guidelines

- Apply when air temperatures are under 75° F.
- Irrigate after application.
- Do not exceed 3/4 pound nitrogen per 1,000 ft² in any single application.
- Do not drag around after aerification.
